Master of Science in Global Supply Chain Management

The Master of Science in Global Supply Chain Management (MS GSCM) is a 100% online degree program. Students develop supply chain management expertise through academic study, case studies, applied simulations, and ongoing interactions with industry leaders and peers. Graduates will have the necessary knowledge in supply chain design, advanced information systems and technology, cost and finance, and best practices for the human side of supply chain management.

The MS GSCM is accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Admission Requirements

Complete the Admission Requirements for Graduate Degrees [link](http://catalog.uaa.alaska.edu/academicpoliciesprocesses/admissions/graduate/).

Applicants must submit: all college transcripts, GMAT or GRE scores, two letters of recommendation, a resume of no more than three pages, and a 300-500 word personal statement describing how the Master of Science in Global Supply Chain Management (MS GSCM) will help the applicant attain their career or personal goals.

Applicants must take and submit scores from the GMAT or GRE. This requirement may be waived if the applicant has 3 or more years of supply chain work experience or a previously earned graduate degree in any discipline from an institutionally accredited institution in the United States or a foreign equivalent.

Applicants with a lower GPA but strong professional experience will be considered for potential success in the program and are encouraged to apply.

Application fees will follow UAA guidelines.

All requirements for applicants whose native language is not English or whose baccalaureate degree was conferred by an institution where English was not the language of instruction will follow UAA testing requirements.

Academic Requirements

Students in the MS GSCM program are expected to complete a minimum of 6 credits each semester, starting with the first term of enrollment. Failure to comply with the 6 credit minimum each semester may result in a student being dropped from the program.

Students enrolled in the MS GSCM program must maintain a minimum GPA of 3.00, with no individual course grade lower than a C.

Students enrolled in the MS GSCM program must maintain and present a portfolio demonstrating their professional competencies and highlights of work completed throughout the program.

Program Student Learning Outcomes

At the completion of the MS GSCM program, graduates will be able to:

1. Collect and synthesize inbound, internal, outbound, and flow information from a real world supply chain setting; identify strategic challenges observed; and propose corresponding strategic directions in supply chain management.
2. Evaluate current supply chain information systems and innovative supply chain management technology and evaluate their application in specific contexts.
3. Outline the trade agreements, market entry strategies, risks, international commercial documents and export packaging requirements, customs clearance procedures, and physical distribution factors in a global supply chain.
4. Propose and apply solutions for managing and leading others in real world global supply chain management contexts.
5. Explain and evaluate multiple factors that impact the cost of logistics and supply chain management.
