## Master of Science in Global Supply Chain Management

## **Program Student Learning Outcomes**

At the completion of the MS GSCM program, graduates will be able to:

- Collect and synthesize inbound, internal, outbound, and flow information from a real world supply chain setting; identify strategic challenges observed; and propose corresponding strategic directions in supply chain management.
- 2. Evaluate current supply chain information systems and innovative supply chain management technology and evaluate their application in specific contexts.
- 3. Outline the trade agreements, market entry strategies, risks, international commercial documents and export packaging requirements, customs clearance procedures, and physical distribution factors in a global supply chain.
- 4. Propose and apply solutions for managing and leading others in real world global supply chain management contexts.
- 5. Explain and evaluate multiple factors that impact the cost of logistics and supply chain management.
