Master of Science in Dietetics and Nutrition

Program Student Learning Outcomes

Students graduating with a Master of Science in Dietetics and Nutrition will be able to:

• Apply foundational sciences to food and nutrition knowledge to meet the needs of individuals, groups and organizations.
• Apply and integrate client/patient-centered principles and competent nutrition and dietetics practice to ensure positive outcomes.
• Apply food systems principles and management skills to ensure safe and efficient delivery of food and water.
• Apply community and population nutrition health theories when providing support to community or population nutrition programs.
• Demonstrate leadership, business and management principles to guide practice and achieve operational goals.
• Integrate evidence-informed practice, research principles, and critical thinking into practice.
• Demonstrate professional behaviors and effective communication in all nutrition and dietetics interactions.
