

Occupational Endorsement Certificate in Conservation Ecology

This program is delivered only through Kenai Peninsula College.

The Occupational Endorsement Certificate (OEC) in Conservation Ecology prepares students to learn about conservation ecology in a hands-on environment in Alaska where climate change is being witnessed. Though this program of study will be based on ecological theory covered in lecture courses, the focus will be on exploring real-world application of conservation research. Through internships and seminars, students will work with government and non-profit professionals that are doing real-time data collection in environmental conservation.

Admission Requirements

- Complete the Admission Requirements for Occupational Endorsement Certificates (<https://catalog.uaa.alaska.edu/undergraduateprograms/oecrequirements/>).
- Complete the Semester by the Bay OEC student application form.
- Qualitative experience(s) in ecology - prerequisite course in Principles of Ecology, Environmental Science, or Program Chair waiver based on relevant experience as demonstrated in student entrance essay and/or artifact submission.

Special Considerations

- Lifting up to 22 kilograms for some projects
- Working in inclement weather and/or for extended periods of time for some courses
- Working in remote field settings for some projects
- Traveling to remote field sites for some courses

Graduation Requirements

- Complete the General University Requirements for Occupational Endorsement Certificates (<https://catalog.uaa.alaska.edu/undergraduateprograms/oecrequirements/>).
- Complete the following major requirements with minimum grade of C:

Code	Title	Credits
BIOL A473	Conservation Biology	3
BIOL A483	Exploration Ecology	2
BIOL A484	Experiential Learning: Exploration Ecology Field Study	4
BIOL A446	Global Climate Change (Global Climate Change)	3
BIOL A492A	Undergraduate Seminar: Semester by the Bay (Undergraduate Seminar: Semester by the Bay)	1

BIOL A495A	Internship in the Biological Sciences	3
Total		16

A minimum of 16 credits is required for the certificate.

Students graduating with an Occupational Endorsement Certificate in Conservation Ecology will be able to:

- Describe and apply basic tenets of conservation ecology and climate change
- Design and implement a research project to examine applied ecology in the field
- Describe current issues associated with ecological conservation in Alaska
- Demonstrate common field and lab skills used by conservation ecologists
