Physics

ConocoPhillips Integrated Sciences Building (CPSB), Room 101, (907) 786-1298
www.uaa.alaska.edu/physicsandastronomy

Physics is the universal science. It is the rational development of experiments, observations and theories to explain the fundamental structure of the universe. Physicists study everything from the smallest subatomic particle to the entire universe.

The laws that physicists have discovered form the basis for understanding the world and also for making the devices and machines that we see and use every day.

The Minor in Physics will provide a valuable option to engineering, math, computer science, chemistry, biology or geology majors. It is widely known that a strong physics background increases a graduate’s employability.

Program of Study

Minor

- Minor in Physics (http://catalog.uaa.alaska.edu/undergraduateprograms/cas/physics/minor-physics)

Faculty

Erin Hicks, Assistant Professor/Planetarium Director, ekhicks@alaska.edu
Nathaniel Hicks, Assistant Professor, nkhicks@alaska.edu
James Pantaleone, Professor, jtpantaleone@alaska.edu
Katherine Rawlins, Professor/Chair, krawlins@alaska.edu
Travis Rector, Professor, tarector@alaska.edu
