

Bachelor of Science in Mechanical Engineering

The Bachelor of Science (BS) in Mechanical Engineering prepares students for a career in mechanical engineering and associated professional fields. Opportunities in mechanical engineering are broad and diverse, including the automotive and aerospace industries, biotechnology, the oil and natural gas industries, renewable energy and environmental controls, manufacturing, computer and electronic hardware, and more. UAA's BS in Mechanical Engineering program provides hands-on learning and professional networking opportunities to prepare students for a successful career.

The BS in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>).

Licensure and/or Certification

Graduates of the BS in Mechanical Engineering gain four years of education credit toward obtaining a Professional Engineer license in Alaska.

This program is designed to meet the educational requirements for professional licensure or certification in the State of Alaska. However, the program might not meet the educational requirements for professional licensure or certification in other states. Please see UAA's Licensure and Certification website (<https://www.uaa.alaska.edu/academics/office-of-academic-affairs/licensure.cshtml/>) for more information.

Admission Requirements

- Complete the Admission Requirements for Baccalaureate Degrees. (<https://catalog.uaa.alaska.edu/academicpoliciesprocesses/admissions/undergraduate/>)

Special Considerations

- Students who intend to enroll in this degree of study are strongly encouraged to complete the following content in high school with a grade of C or better: Trigonometry (1/2 year), Physics (1 year), Algebra (2 years), Chemistry (1 year), and English (3 years). Insufficient preparation may increase the number of semesters required to complete the degree.
- All prerequisites for engineering courses must be completed with a minimum grade of C, and all courses listed in the major requirements must be completed with a grade of C or higher. A student who is unable to earn a grade of C or higher in a program course offered by the College of Engineering will be required to meet with a department faculty advisor to develop a plan for improvement of academic performance before continuing in the program. A student who fails to earn a grade of C or higher on the second attempt will be required to meet with an academic advisor and a member of the College of Engineering professional advising staff to develop a plan for improvement of academic performance before continuing in the program. A student who fails

to earn a grade of C or higher on the third attempt will be removed from the program. Re-admittance requires a letter of appeal from the student requesting re-admittance with an explanation of any mitigating factors and how these factors have been addressed. Re-admittance is subject to approval by the faculty of the program and is communicated by the department chair.

- The program requires its students to abide by the principles of academic integrity described in the Student Code of Conduct. Should suspected cases of academic misconduct occur, these cases may be submitted to the UAA Dean of Students Office, where the assistant director of student conduct reviews all allegations of academic misconduct. At the conclusion of the review, the assistant director of student conduct issues a notification of the findings and conclusions to the reporting faculty member, department chair and dean. Should a student from the program be found responsible for a case of academic misconduct by the UAA Dean of Students Office on two separate occasions, that student will be removed from the program. Re-admittance requires a letter of appeal from the student requesting re-admittance with an explanation of any mitigating factors and how these factors have been addressed. Re-admittance is subject to approval by the faculty of the program and is communicated by the department chair.

Graduation Requirements

- Complete the General University Requirements for Baccalaureate Degrees (<https://catalog.uaa.alaska.edu/undergraduateprograms/baccalaureaterequirements/gers/>).
- Complete the General Education Requirements (GER) for Baccalaureate Degrees (<https://catalog.uaa.alaska.edu/undergraduateprograms/baccalaureaterequirements/gers/>).
 - The 3 credit Tier 1 Quantitative Skills GER will be met and exceeded by the following degree requirements: MATH A251 or MATH A251F, MATH A252 or MATH A252F, and MATH A253.
 - The 7 credit Natural Science GER will be met and exceeded by the following degree requirements: CHEM A105, CHEM A105L, PHYS A211, PHYS A211L, PHYS A212, and PHYS A212L.
- Sit for the Fundamentals of Engineering (FE) examination administered by the National Council of Examiners for Engineering and Surveying (NCEES).
- Complete the following major requirements with a minimum grade of C:

Code	Title	Credits
Core Courses		
BA A300	Organizational Theory and Behavior	3
or ESM A450	Economic Analysis and Operations	
CHEM A105 & A105L	General Chemistry I and General Chemistry I Laboratory	4
EE A203	Fundamentals of Electrical Engineering I	3

ENGR A151	Introduction to Engineering	1
ES A106	Engineering Graphics	2
ES A209	Statics	3
ES A210	Dynamics	3
ES A261	Introduction to Engineering Computation	3
ES A331	Mechanics of Materials	3
ES A341 & ME A341L	Fluid Mechanics and Fluid Mechanics Lab	4
ES A346	Introduction to Thermodynamics	3
MATH A251	Calculus I	4-6
or MATH A251F	F.A.T. Calculus I	
MATH A252	Calculus II	4-6
or MATH A252F	F.A.T. Calculus II	
MATH A253	Calculus III	4
MATH A302	Ordinary Differential Equations	3
ME A203	Machine Design I	3
ME A303	Machine Design II	3
ME/EE A306	Dynamics of Systems	3
ME/EE A308	Instrumentation and Measurement	3
ME A334 & A334L	Materials Science and Materials Science Laboratory	4
ME A403	Machine Design III	3
ME A414 & A414L	Thermal System Design and Thermal System Design Lab	4
ME A438	Design of Mechanical Engineering Systems	3
ME A441	Heat and Mass Transfer	3
PHYS A211 & A211L	General Physics I and General Physics I Laboratory	4
PHYS A212 & A212L	General Physics II and General Physics II Laboratory	4
STAT A307	Probability and Statistics	4

Advanced Engineering Electives

Complete 12 credits, including at least 9 credits of ME courses, from the following:

ME A408	Mechanical Vibrations
or ME A608	Mechanical Vibrations
ME A421	Engineering Finite Element Analysis
or ME A621	Engineering Finite Element Analysis
ME A432	Analytical Dynamics
or ME A632	Analytical Dynamics
ME A434	Materials Selection for Design
ME A442	Advanced Fluid Mechanics
or ME A642	Advanced Fluid Mechanics
ME A451	Aerodynamics
or ME A651	Aerodynamics
ME A454	Manufacturing Design

ME A456	Renewable Energy Systems Engineering
or ME A656	Renewable Energy Systems Engineering
ME A459	Fracture Mechanics
or ME A659	Fracture Mechanics
ME A460	Turbomachinery
or ME A660	Turbomachinery
ME/EE A471	Automatic Control
ME A630	Advanced Mechanics of Materials
ME A664	Corrosion Processes and Engineering
ME A672	Advanced Linear Systems
or EE A472	Advanced Linear Systems

Total **100-104**

A minimum of 124 credits is required for the degree, of which 39 credits must be upper-division.

Honors in Mechanical Engineering

The BS in Mechanical Engineering recognizes distinguished achievement by conferring programmatic honors in mechanical engineering. In order to receive honors in mechanical engineering, a student must meet the following requirements:

- Complete all program requirements;
- Earn a minimum cumulative GPA of 3.50 or above in the courses required for the major;
- Gain approval for, complete, and present a design/research project prior to applying for graduation. The project proposal, presentation and final written report must be approved by the program faculty.
