

Associate of Applied Science in Criminology and Criminal Justice

Program Student Learning Outcomes

Students graduating with an Associates of Applied Science in Criminology and Criminal Justice will be able to:

- Describe the structure and operation of the criminal and juvenile justice systems.
- Summarize the primary correlates and causes of crime and criminal offending.
- Evaluate competing perspectives on ethics and professional conduct within justice professions.
- Identify risk factors for criminal victimization and describe the role played by victims in the criminal legal process.
