Diagnostic Medical Sonography

Diagnostic Medical Sonography
Allied Health Science Building (AHS), Room 148, (907) 786-6928

Students learn anatomy, physics, equipment operation and scanning
techniques to image a variety of body organs and tissues using
high-frequency sound waves. The program prepares competent,
text level general sonographers in the cognitive (knowledge),
psychomotor (skills) and affective (behavior) learning domains. General
sonographers work in a range of medical settings from freestanding
imaging centers to medical centers.
