Program Student Learning Outcomes

Students graduating with an Associate of Applied Science in Fire and Emergency Services Technology will be able to:

1. Discuss the history, support organizations, resources, incident management, training and emergency operations and relate how each plays a role within emergency services.
2. Define and use basic terms and concepts associated with the chemistry and dynamics of fire.
3. Relate how fire prevention and fire inspections are connected.
4. Demonstrate the importance of public education in relation to fire prevention.
5. Identify the equipment and systems used in control and extinguishment of fire.
6. Identify the types of building construction and their uniqueness under fire conditions and how these components are related to firefighter and life safety.
7. Relate how the basic principles and history related to the national firefighter life safety initiatives foster the need for cultural and behavioral change throughout the emergency services.
