

Occupational Endorsement Certificate in Web Engineering

Students graduating with an Occupational Endorsement Certificate in Web Engineering will be able to:

Create engaging commercially-oriented web pages that properly mix web development programming languages, a client-side scripting language, and a server-side scripting language;

Create responsive, accessible, and compliant web-oriented documents;

Integrate database content into a web site;

Create client-side scripts that provide dynamism, error checking, and content to a web page;

Create web site e-commerce components such as logins and shopping carts.
