Bachelor of Science in Occupational Safety and Health

Program Student Learning Outcomes

• Anticipate, recognize, evaluate, and develop control strategies for hazardous conditions and unsafe work practices.
• Apply the fundamental aspects of occupational safety: industrial hygiene, environmental science, fire science, hazardous materials, ergonomics and human factors.
• Design, implement, and evaluate safety, health, and environmental programs.
• Apply adult learning theory to the design and delivery of safety training programs.
• Interpret and apply applicable standards, regulations, and codes.
• Conduct incident/accident investigations and analyses.
• Evaluate and apply business and risk management concepts.
