Associate of Applied Science in Industrial Process Instrumentation

This program is delivered only through Kenai Peninsula College.

The Associate of Applied Science (AAS) in Industrial Process Instrumentation prepares students for entry-level employment in a variety of process industries such as petroleum, mining, power generation, chemical manufacturing, renewable energy, and food processing.

Program coursework includes pneumatic instrumentation, electronic instrumentation, computer digital interfacing, distributed control systems (DCS) and supervisory control and data acquisition (SCADA) applications. Students gain hands-on experience with instrument loop tuning, instrument installation, troubleshooting and repair.

The AAS in Industrial Process Instrumentation constitutes the first two years of the Bachelor of Science (BS) in Applied Technologies Leadership.
